Teams Meetings Calls Files More

Intuitive search for Retail & Manufacturing data in Microsoft Teams App

Why NLSQL?

NLSQL empowers employees with intuitive natural language interface to site P&L, sales history or other poorly accessible data sources to inform and speed business decisions with significant benefits and new competitive advantages for our customers.

Simple

Easy as Google search

Precise

Up to 100% accuracy. Best rate in class.

Secure

No sensitive data transfer outside

Compatible

Fits existing IT environment

Benefits for our customers

- **No need to wait when data analyst** pull out requested figures from the database. **Anyone can get data by themselves and drill down into end-to-end analytics. No technical skills required.**
- **No need to open several data sources** for the complex calculation. **You can have one MS Teams Application for requesting data from multiple data sources using only Natural Language requests. NLSQL provides industry fastest complex calculations!**
- **No need to share sensitive or confidential information with 3rd parties.** **NLSQL doesn't require any sensitive or confidential data transfer outside your corporate ecosystem. NLSQL works as external NLP to SQL API based on database structure emulation only.**

NLSQL live demo available based on open data of import-export trade balance transactions from the USA worldwide

NLSQL Software available on Azure Marketplace and is certified for using with SAP, and we have been developing text interfaces for Retail & Manufacturing industries since 2018. Dubai Chamber of Commerce & Industry recognized NLSQL as ready for a Market Scaleup at Middle East Market.
